↑ ABSTRACT

Two computer graphics systems for the presentation of biomedical information for diagnosis and treatment planning are described. Both systems presented utilize computer tomographic (CT) data as input. One of the systems produces three-dimensional surface representations of organs and anatomical features found within the body. The other system is a radiation treatment planning aid which uses tomographic data in its computations.

↑ INDEX TERMS

Primary Classification:

I. Computing Methodologies

↳ I.3 COMPUTER GRAPHICS

↳ I.3.3 Picture/Image Generation

Additional Classification:

I. Computing Methodologies

↳ I.3 COMPUTER GRAPHICS

↳ I.3.5 Computational Geometry and Object Modeling

J. Computer Applications

↳ J.3 LIFE AND MEDICAL SCIENCES

↳ **Subjects:** Medical information systems

General Terms:

Design, Human Factors, Theory

Keywords:

Computer graphics, Radiation treatment planning, Smooth-shaded color displays, Three-dimensional surface representation
